*"Transforming the Way You Test!"*

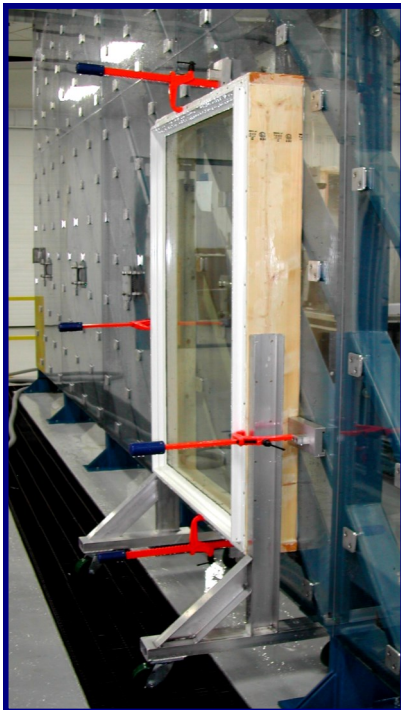

## Test Wall System

**ASTM - AAMA - NAFS - DADE - CE - JIS**

ATS **test walls** are purchased in 6' wide x 10' tall sections. Additional custom sections can be added for the height of your product. Our wall system allows you to **quickly stage** and test for **air** infiltration, **water** penetration, uniform **wind load** and **hurricane cycling** performance. Each 6' section is designed with a shut-off valve plumbed into a 4" rigid pressure line. As a result, **multiple units** can be tested simultaneously (air infiltration is the exception). A pair of light-weight high capacity aluminum buck dollies and four mounting clamps are **included** with each section.

### KEY FEATURES:

- **Durable** epoxy painted frame with aluminum and stainless steel hardware
- 1/2" thick clear **polycarbonate surface** for viewing and structural integrity
- Test ports are hard plumbed with a **shutoff valves** and pressure deflectors
- 4" diameter air lines throughout—standard
- Overhead plumbing allows for a **clear viewing area** of the product under test
- Aluminum **buck dollies** and quick mount clamps for test unit staging
- **Modular design** for expanding the test surface

**Test Unit**

*Mounted on buck dollies and secured for testing*

**5 Section Test Wall System**

*Back view showing overhead pipe bridge and individual shutoff ports*

### Other Products and Services:

- Air-Water-Structural Systems
- Test Wall Systems
- Spray Rack Systems (mobile / stackable)
- Digital Deflection Measurement Systems
- Water Recycling Systems
- Impact Cannon (large / small missile)
- Hurricane Cycling Systems
- Calibration Systems
- Acoustical Test Systems
- Thermal Test Systems
- Custom Data Logging Systems

### Mission Statement:

*"To design and manufacture high quality, cost effective, user-friendly test equipment - delivered with integrity."*
